- Improve Supervision and Management

View LIVE video from Fairport, NY:
www.AstraNetworks.net/network_cameras

- Panasonic Network Camera's can be placed anywhere in and around a business—Indoors or Outside.
- View a single camera or multiple cameras in full motion video or still images from any PC on your internal network or the Internet. Also, images can be viewed on a Web-enabled cell phone, PDA, or television.
- Images are crisp and sharp, even in low light or at night. (Especially when compared to legacy analog CCTV systems).
- Listen to audio with a built-in microphone. Hold a two-way conversation with an external speaker (sold separately).
- Control image manually with full pan, tilt and zoom* buttons, or with up to 20 preset positions.
- Capture and store images and video on a SD memory card, a PC hard drive or a Network Video Recorder (NVR)
- Recording is triggered manually, by a timer, by motion, or by an external sensor. Images can be transferred via e-mail or ftp.
